High School Graduation Ball Proves Event of School Season

Friday night in the Memorial Hall saw a large group of students and their guests mark the high school graduation of this year's Grade XII class, when parents, friends, graduates and students gathered for a really entertaining evening of dancing.

Part way through the evening, Principal S. H. Crowther called the girls of the graduating class to the platform, introduced them to the audience, and then presented each with a corsage, on behalf of the teaching staff. The boys of the class then followed the girls to the platform, and received bouquets.

A coke bar was installed in the dining room, and Jimmy Hison did heavy duty pushing the sales. Aiding the bar were a number of "cigarette girls" who made rounds of the hall supplying needs of customers.

Organized by the Students Council, the affair was a thorough-going success, and the students are to be congratulated on the fine showing they made.

Nightingale at Carlsbad

Bow Valley Regular Meeting

This meeting followed the hearing of our protest against increased school division regulations before Commissioner J. W. Judge at this office. The three divisions in question were represented by their Trustees and Secretary Treasurers.

Messrs. Harwood, MacArthur, Wheatley and Jackson present at said hearing and at Council meeting. The minutes of previous meeting were adopted and Councilor W. H. Hartel's resignation was accepted with regret. Mr. Hartel was to be thanked for his three years efficient service by a personal letter. Councilors now come with in the scope of the Workmen's Compensation Act and the necessary application was made to the Board. A copy of the Report of the Royal Commission on Taxation was received and Mr. Judge's recommendations found favor with this Council. George E. Bell M.L.A. called and discussed the current grants available from the Dept. of Public Works for roadwork. We are encouraged to believe that help will be forthcoming from the Dept. to assist in the repair of roads and structures damaged by the spring freshets.

Application for a Wholesale Gas License was approved for Messrs Corbille & Gibeau of Cluny, and an Implement Dealers License to Mr. H. O. Christensen of Chancellor. The Municipal Mill rate for the year 1948 will be 16 Mills on the dollar. School rates were set at:

Wheatland 19.8
Carlsbad 19.8 plus 3.7 special
Strathmore 19.8 plus 3.4 special
Calgary 16.7
Bow Valley 12.2
Dana 19.8
Gleichen 19.2

All our available machinery is now on the job repairing damaged roads and replacing structures. We also expect the Government Bridge Building crew to replace bridges washed out and to erect new bridges in the near future. Secretary Treas. Salary set at \$280.00 and Ass. Sec. at \$150.00. Mr. Harwood was placed on a Committee to arrange for

Sunday August 8—
Strathmore at Nightingale
Rockyford at Carlsbad
Sunday August 15—
Nightingale at Rockyford
Carlsbad at Strathmore
Sunday games start at 2:30 p.m.
Wednesday games start at 6:30 p.m.

Golf Course Near Ready

Work on the golf course has reached the stage where members of the executive feel it will be ready for playing on in the near future.

Under Mr. Ira Smith, who was engaged as caretaker for the season, work on the course is moving steadily ahead. Two loads of sand have been moved in, and are being used for greens, and it is expected that another will be required.

Weeds on the greens have been dug and sprayed, and with oil sprayed on the sand, there should be no further trouble for them.

Mr. T. S. Hughes was successful in obtaining sufficient used rubber mats for the greens at a bargain price, and these will help greatly.

The lawnmowers are being repaired, and put in shape to pull together, and since a team has been procured, mowing will get under way in the near future.

Gravel from a pit owned by Mr. F. J. Schuman. The crushing outfit will commence operations near Irtica as soon as the roads are dry enough to carry trucks. This Council will make a general inspection trip over the whole municipality before next meeting set for June 14th. Graveling will be included in our current programme but new construction will be limited, if any.

Mrs. Henderson Passes in Calgary

Mrs. Beatrice Henderson passed away late Tuesday night in the Holy Cross hospital, Calgary, following a series of operations.

Mrs. Henderson, who was 37 years, was born in England, and came with her parents, Mr. and Mrs. Walkdon to Canada at an early age. For some years Mr. Walkdon operated a laundry at Strathmore, where his daughter assisted him.

On September 30, 1920, she married Mr. Archie Henderson. Mrs. Henderson had been undergoing treatment for an undiscovered ailment for almost two years, and had come through a series of operations. High hopes were held for her recovery from the latest, but without much warning, she slipped away.

She is survived by her husband, five daughters, Peggy, Beverly, Betty, Shirley and Dorothy; four sons, Frank, Archie, Bobby, and Kenny; one sister, Mrs. Robert Towers of Canmore and four brothers, Ralph, Canmore, Robert, Wallace, Calgary, Harry, of New South Wales and Jack of Nelson. Mrs. Henderson was an interested

Dancing and Debating Feature Meeting of Home and School

The dining room of the Memorial Hall was filled on Monday evening for the last meeting of the Home and School Association for this year. An interesting program held the close interest of the group throughout the meeting, over which the Rev. A. A. Hamilton presided.

A well trained chorus of pupils from Grades four to seven, under Miss Skjole and Miss Blair sang in unison, the pupils remaining as a back ground for the minstrel, enacted by six young folk in very pretty costume, in the formal type.

These costumes were the handwork of Miss Blair, and the dancers gave citizenship and a greater respect a dainty portrayal, reflecting credit on their teacher Miss Skjole.

The Panel Discussion on Academics vs. Progressive Education discussed by Father Gibbons and Jerome Hansen for the former and Mr. MacLeod, Supt. of Schools in the Wheatland S. D., and Mr. T. M. Parry, Vice Principal of Western Canada High School in Calgary, supported the Progressive side.

Early in the discussion, Progressive and Vocational were termed synonymous.

Father Gibbons explained that Education is intended to develop and draw out the ability of the individual.

He said an educated man must please turn to page ten—

And Now Comics

Since many of our customers have long wanted "funnies" in The Standard, (and since the customer is, naturally, always right) we have at last succeeded in obtaining comics which we think our readers will appreciate. Now, with Br'er Rabbit and Mickey Mouse on the inside, the kids will have an even harder time getting the paper from Dad.

Hi Y Girls Plan Outing at Banff

Approximately twelve Hi-Y girls, under the leadership of Mrs. A. Polley are planning to spend the coming week-end at the YWCA Holiday House in Banff. Mr. and Mrs. Charles Bremner have obligingly agreed to take them up. The girls are planning to leave around 5:30 Friday evening, and will return Sunday night. A week-end of fun and excitement is anticipated by the excited girls.

Funeral Services For Mrs. Lyons

Rev. Cyril Hutchinson of Calgary conducted an impressive service Saturday last, at the funeral of Mrs. Janie Lyons. Mrs. Walter Mercer sang "Beautiful Isle of Somewhere" and the choir rendered appropriate hymns. At the grave side the Ladies Auxiliary of the Canadian Legion, led by Mrs. Tew, performed their brief service. McInnis and Holloway were in charge of funeral arrangements.

ed member of the Ladies Auxiliary to the Canadian Legion, having been a charter member of the Strathmore Branch. The Auxiliary will take part in the funeral services, which are to be held on Saturday afternoon at two p.m. from St. Michael's Church, with burial in Strathmore Cemetery.

Town Council

All members of the Town Council were present at the meeting on Tuesday with the exception of the mayor. Councillor Selmons took the oath of office, as this was his first meeting since the election.

An application having been received from a carnival to set up tents and rides here over the week-end, it was agreed to permit them use of the park until midnight on a basis of one hundred dollars for the first day and fifty dollars for the second day. The offer was agreed to, and permission given for the carnival to set up June 4 and 5.

The mill rate cannot be set until at least July 5th, it was announced at the meeting. This is because assessment notices are unlikely to be completed before the 5th of June, and ratayers must be given thirty days in which to file appeals if they intend to do so. The total assessment, however, is likely to be in the neighbourhood of \$105,000, which assessment will bring down slightly the mill rate as mentioned in the last council meeting report.

Permission was granted the Canadian National Institute for the Blind to hold a tag day in town.

Work necessary in regard to the swimming pool was talked over, and steps will be taken shortly to clear out the hay, and get the pool in shape.

Streets and culverts were discussed briefly, but further action is being held up until the budget is discussed.

Revised estimates as to the cost of water and sewer, in line with today's increased costs, have been asked for from the engineer by the 5th. Following receipt of these, it was proposed, they should be sent to Edmonton to learn if the Town could borrow sufficient money. It was felt unofficially that the increase would be somewhere in the neighbourhood of thirty percent.

Dave Longbotham Buys Local Laundry

Announcement was made early this week of the sale of the Strathmore Laundry and Dry Cleaning plant to Dave Longbotham, formerly of Balintre. Mr. Johnny Mohr, former owner, has disposed of his interests after operating the plant since he took over from Cliff Wills last fall.

Business was so heavy that both previous owners moved away from it, but Mr. Longbotham plans to

take care of the burden with additional staff, so that he can offer full service to customers from town and country.

Arrangements have been made for an improved dry-cleaning service, and Mr. Longbotham feels confident that the town will welcome both the dry-cleaning and laundry service which he intends to offer. He already has plans for extending the service, but feels that time is necessary for these to get moving.

EDITORIAL COMMENT

The Strathmore Standard, established in 1909, a member of the Canadian Weekly Newspapers Association is published Thursdays at the Standard office, Strathmore, by Charles A. MacLean, Editor and Publisher. Subscription price, \$2.50 per year in Canada; \$3.00 per year outside Canada.

Member of the Audit Bureau of Circulations. Authorized as second class mail, Post Office Department, Ottawa.

CONSERVATION OF SOIL IS ALL IMPORTANT

In the current issue of The Reader's Digest is an article by Louis Bromfield, an American author, who also has engaged in farming on a large scale. It would be well if all farmers were given a copy, as it is written in such interesting form that even a newspaperman with no experience in farming was impressed by the reasons given for soil conservation, and of the results obtained over a number of years by Bromfield and his co-workers, all farmers.

One very important point of Mr. Bromfield's article explains that though mechanization has enabled agricultural production to be carried on more efficiently as regards eliminating manual labor and the use of horses, it has not lessened the vital necessity of repeatedly fertilizing the soil to maintain its production.

From experience and experiments it was found in the group of farms operated that it was more profitable to find out which land was the most suitable for certain crops, and which was profitable for growing clover for feed or using some land for an orchard. He also pointed out that too much diversification in farming will require far more energy and outlay than if a farmer concentrates on one or two things. For instance in some cases it was found that from ten acres of land properly cultivated and fertilized, as much could be produced as from 50 acres cultivated or planted in the way most farmers do.

But no matter how efficiently a farmer may do his work with the latest machinery, he cannot continue to produce profitably unless his land is replenished systematically. Soil robbing eventually makes production less, crops more susceptible to plant disease, and in some cases bankrupts a farmer. That's why farms are oft-times abandoned. Had soil conservation been observed over a number of years, the farms would have continued to produce profitably.

One has only to gaze over his large western farms to realize that in the main Mr. Bromfield is right in stating that the United States and Canadian methods of farming are wasteful in that much more land is used than is necessary and the greater net profits would result with less work and worry if smaller acreages were cultivated and the soil systematically fertilized.

"You'll never succeed at farming by fighting Nature," observes Mr. Bromfield; "you have to work with it."

— Macleod Gazette

Newfoundland and Confederation

Many hundreds of citizens across Canada will be interested in the results of today's vote in Newfoundland, and will watch with considerable interest the feeling displayed in this little colony on the fringe of our shores.

It is quite likely that many will feel the result is a tangible recognition of Canada's place in the world of nations of today.

However, this is not likely to be a very true appraisal of our stature, even in the eyes of the Newfoundlanders. For one thing, the vote is to be split three ways, and none will win in this election. It amounts only to an elimination vote, with the least favored of the three systems being discarded, and a later poll will be held to discuss the remaining two alternatives. So that, if, as is likely, the opponents of confederation with Canada link up with each other, they will have two chances to defeat confederation.

The alternatives facing the people are a continuation of government by commission, such as it has during the past few years, return to Dominion status, or federation with Canada. Newfoundland has always felt that, joined with Canada, she would find that she occupied something in the position of a fifth wheel, much as the maritime provinces feel at times now, and have felt in the past.

Whether this would be the case, or whether Newfoundland will find that her prosperity is inevitably linked with that of Canada is hard to say. Certain it is that as a new province in the Dominion, Newfoundland would be welcomed by many, probably most of our people. Geographically it would seem the logical thing to do.

But then, people aren't always logical about their loyalties.

§ §

Subscriptions and Subscribers

Noting that we would be revising the mailing list of subscribers completely in the next two weeks, we thought maybe some of our subscribers wouldn't mind too much realizing that their subscriptions are due, or overdue, so we're back at it with the reminder notes again.

There were a few weeks there, back when the roads were impassable, and some people weren't getting out for weeks at a time, when we didn't bother to stop the paper, because we realized many people knew their subscription had lapsed, and couldn't do much about it anyway.

But that picture is all changed now, and we don't think our readers want us to carry them any more than they want Macleod's or the Saturday Evening Post, or the Calgary Power or the telephone company to carry their bills.

Most people, in our experience, would rather know when their paper runs out than to wake up with a surprise some time and find they're weeks behind time.

So the notices are in the mails again. Thanks for helping us out.

In Others' Words

A GREAT GAIN

Farm and Ranch Review, Calgary

The significance of the conclusion of the International Wheat Agreement is this: It marks an important reversal in the thinking of the importing countries. Our customers now realize that "cheap" food policies, pushed to their logical extreme, mean self impoverishment of the people who eat the food. That realization is a tremendous gain for the primary producers in Western Canada.

The ruinous collapse of prices on this continent in the 1930's under the futures market system helped to produce breadlines in Europe. The milling interest abroad made immense profits while the difference between \$1.50 wheat and 35 cent wheat was not reflected in similar reductions in bread prices. But the Agricultural depression, that made it impossible for us to goods regardless of price, destroyed the markets and the jobs of

the workers who were our customers.

We, in the West, know that there is no enduring prosperity for us in 33 wheat. We know all the consequences of booms and busts. So, now, do the people who buy our food. Neither the producers nor the consumers can enrich themselves through the impoverishment of the other. We will go on from there to a more sensible and happier world.

There will remain, however, some rather serious difficulties to be surmounted if the agreement is to run successfully through the next five years. Most pressing and serious of all is the foreign exchange famine. Getting currency with which to buy our food will remain Britain's major task for many months to come. It is not only the consumer's task, it is Canada's responsibility too.

THE VISION REMAINS

As the centuries have unrolled the seer has written his record on the script for posterity to study; there have been great and solemn moments when humanity has stood on the edge of the cliff, and looking to the hills, villages and prairies which stretch towards the unknown horizon.

Just a moment was the gathering at San Francisco two and a half years ago when representatives of world nations met in solemn council to draft the charter of a new league of nations.

Unfortunately things have worked out differently than was planned and hoped for at that gathering.

We think that the deterioration which has descended between nations since then is attributable to Soviet Russia. They think the democratic nations are to blame.

But the hope remains, the dream that the forces of decency and righteousness will win because the spirit of man has been climbing the upward path the long centuries of travail. Because there has been failure in the past we should not despair. There have been accomplishments, too, and great leaders may yet arise, who will, by tolerance, wisdom and leadership, help guide the caravan of history to a brighter frontier.

GOOD GOVERNMENT

Something new in the way of government is being acknowledged by the part of a Council must be acknowledged this week as we take pleasure in publishing a letter from the secretary of the M. D. of Waterloo on behalf of the council of that district explaining to the taxpayers why the increased taxation was necessary this year. The effects of such a move on the part of the council should be far reaching. It should be known to every member of any community governing body that they are responsible for their actions to the electorate and that this electorate does not like to be

kept in the dark regarding the whims and whippers.

Too often in the past have governments taken action in their own hands as indeed they must but when the action has been taken it is only fair and just that the action be explained so that there can be no doubt either as to the sincerity of the move or the authenticity of it.

No matter what promoted the Council of the M. D. of Waterloo to should have taken this paper, it must be taken at its face value and the action as we see it is one that needs to be repeated.

—Olds Gazette

Building Canadian Citizenship

Some so called hatteries came over from Ponoka on Sunday to take part in one day tournament, and they did not seem to be different from our own people after all. The only difference was that they wore whickers. They talked the same and they made the same sort of golf shots which means that they shied and pulled just like the native born.

Perhaps the secret of develop-

ing citizens in this province is to get them to play golf or baseball. In the summer and take part in hockey and curling in the winter. Games of this kind have a levelling influence which tends to place all who take part on the same plane. They mingle together on the basis of sport and the roster of many a hockey team has more foreign names than Anglo-Saxon.

—Stettler Independent.

"Catching" The Tourists

The whole basis of a successful and expanding tourist industry depends on courtesy, good will and service, and while the reception of tourists is in the hands of the public generally, it is the waitresses who come into more direct relationship with them and with all visitors. Wenatchee recognizes that fact and their waitresses might have been graduates of ladies colleges.

Hence it was not for nothing that we decided to stay overnight at Wenatchee on our return trip, and give what little business we had to the girls who talked to us about their fruit industry, who demonstrated the quality of their fruits by what they served from the menu and who went around filling our coffee cups when they became half full.

Stettler Independent

ITEMS OF INTEREST IN THE WORLD OF FOODS/UFFS

A record wheat crop is forecast for China, according to the U.S. official estimate, which places production at approximately 265 million bushels. The unusually high output is attributed to higher yields from a smaller acreage than that sown in recent years. Barley production is estimated at

approximately 235 million bushels, some 5 per cent above the 1951-1952 average and the largest crop since 1935.

Rumica, owing to the surplus of corn and the decline of wheat, has sown 2,000,000 acres to wheat which were formerly used for corn. Canada's rice acreage for harvest in 1948 is now placed at 1,512,000 acres, an increase of 33 per cent over the 1947 acreage of 1,156,000 acres.

Gladden-Willson Marry, Honeymoon In England

A quiet wedding was held at St. Stephen's Anglican Church, May 29 at 4:30 p.m. when Mrs. Eve Willson became the bride of Mr. C. R. Gladden of Nightingale, Alberta. Canon E. H. Maddocks performed the ceremony. Large baskets of carnations and snapdragons in pastel shades were used to decorate the church.

The bride wore a suit of beige brown gabardine with beige accessories. Her corsage was of roses and forget-me-nots and she carried a white prayer book.

Mrs. Thomas H. Marsh, of Vancouver, was her sister's matron-of-honor.

Col. E. R. Knight gave the bride away and the bridegroom was attended by his cousin, Mr. Reginald Thurston, of Nightingale. The ushers were Mr. Peter Willson, Mr. Harry Double and Mr. Michael Jamieson. During the signing of the register, Miss Marge Whittall sang "O Perfect Love."

A small reception was held at the bride's home where Mrs. E. R. Knight and Mrs. R. Carrington poured tea. Canon Maddocks proposed the toast to the bride.

Mr. and Mrs. Gladden left that evening for a two months' honeymoon to the British Isles.

Namaka Notes by Mrs. E. B.

Mr. and Mrs. Sam Moss of Berna were Sunday evening visitors to Mr. and Mrs. Wm. Fawkes and family.

Mr. and Mrs. Dave Kermack were Sunday visitors with Mr. and Mrs. L. R. Aitkens.

Mrs. J. Lepp invited a number of friends on Friday afternoon to help celebrate Helen's second birthday.

Miss Norma Jean Hogg will be guest speaker at the Friendship Club meeting at Mrs. A. Thompson's home on June 10th. Any non-member who is interested are welcome to attend this meeting.

The Namaka W. A. will meet at Mrs. Irene Sanden's home on Thursday, June 17th, instead of June 10th as previously reported.

Out-of-town guests were Mrs. R. G. Thomlinson of Edmonton, Alberta, and Mrs. B. A. Cavan, of Wetaskiwin, Alberta.

Berryvale W.I.

The regular meeting of the Berryvale W.I. was held at the home of Mrs. C. Way on May 27. A roll call was answered with 'merry stretchers,' which proved most useful. Plans were discussed for the coming convention. Plant slips were exchanged. A bounteous lunch was served to eight members and on-visitor.

Cardinal Commends Scouting

His Eminence J. C. Cardinal McGuigan, Archbishop of Toronto, in a special message to Canada's Boy Scouts has said: "The Catholic Church throughout the world has made use of the Boy Scout Movement which is providentially adapted to the needs of boys today."

"Some of the great saints of the Church like Thomas More in England and Isaac Jogues in Canada have been held up as perfect examples of the Scout Law and Promise. As the present Pope Pius XII has said, Scouting gives to the worship and service of God the pre-eminent place that it ought to have in human life."

"I rejoice on the Fortieth Anniversary of the Boy Scouts Association, and I pray God to bless and increase its beneficent work."

Rural Gleichen

Mrs. Lilja was hostess to the U.F.W.A. on May 27 at her home, owing to the busy season. It was a small gathering of ladies. In the absence of the president, the Vice-president, Mrs. J. A. MacArthur conducted the meeting.

Usual business was dealt with after which a social hour was greatly enjoyed.

A tasty lunch was served by members of the organization. Next meeting June 10th, hostess is Mrs. S. Duncan.

The students of the Gleichen High School held a picnic near the steel bridge on the Bow river south of Gleichen Thursday afternoon.

Campbell Brown has purchased the residence of Bustanattattooe the residence of Buster Stott and will take possession the middle of June.

The O.E.S. held a tea at the home of Mrs. R. S. Haskayne, in honor of Mrs. J. Wright, who is soon leaving Gleichen to join her husband at Exshaw, Alberta.

After a pleasant social afternoon, Mrs. E. Prouse presented Mrs. Wright with a beautiful hand painted friendship cup and saucer and Mrs. Wright responded very graciously.

Born to Mr. and Mrs. Hugh Wilson of Gleichen, a seven pound son on May 24 in Calgary Hospital. Congratulations.

Mr. and Mrs. T. Boos and family moved to Calgary the past week. Mr. Boos accepted a position as watch repairer with a Calgary firm.

Constable J. Allen of the RCMP who has been here for some time, has been transferred to Fort Smith.

Born to Mr. and Mrs. Ricky Clifford, a daughter in the Bassano hospital.

Mrs. F. Sammons entertained in her home with a birthday party Saturday in honor of her daughter Ruth.

Frank McKay, son of Mr. and Mrs. Si. McKay, has joined the staff of the C.P.R. and will be a waiter on their dining cars. His run will be from Vancouver to Montreal.

While Cpl. Amy R.C.M.P. is confined to the Belcher hospital, Calgary, Cpl. Wall of Bassano, who have charge of both towns, and will be assisted by another constable.

Mrs. K. McPhee and Mrs. B. McMillan motored to Calgary Wednesday to see Mrs. McPhee's grandson and Mrs. McMillan's great grandson. Mother and son are fine.

Mr. and Mrs. D. Duncan from Calgary, visited over the holiday with Mr. and Mrs. S. Duncan.

Mr. and Mrs. J. Wilson entertained at a dinner for Mr. and Mrs. T. Brown and family Sunday.

Elliott Evans of Lethbridge visited his parents Mr. and Mrs. Geo. Evans for a few days last week.

NEW AMBASSADOR FORMER SCOUT

Sir Oliver Franks, the new British Ambassador to the United States, is a former Wolf Cub, Boy Scout and Rover Scout, and is the youngest British Ambassador there has ever been appointed to the United States.

Pie Covered Faces Mark Sunday School "Extravaganza"

A fair crowd gathered at Hirtle's Theatre Tuesday night for the long postponed Sunday School pie eating contest, quiz program and amateur program. With R. J. Milligan acting as Master of Ceremonies, the evening's entertainment opened with community singing.

In the Amateur Program, Hilda Ekes won first prize with her piano solo. Shirley Logan came second with her accordion, Elaine Thew's solo won third place and little Carleen Sorensen came fourth with a delightful rendering of a popular song.

The next event was a quiz pro-

gram. Five boys and five girls were called on the platform for this event. The girls participating were, Hilda Ekes, Dorothy Stollery, Nancy Kondo, Gwen Stollery and Kay Bennett. The boys were Raymie and Georges Palardy, Brendett Kearns, Dick Stollery and Herby Wright. The girls won in the event.

Eleven youngsters participated in the pie-eating contest. A hilarious time followed as the participants gobbled down their portions of chocolate pie. One spectator's comment: "The more you get on your face, the less you have to eat," certainly seemed true. The winner, chosen by elimination, was Raymie Palardy. Eight remaining pies were auctioned by Mr. Tench. Prizes were given out, and singing of God Save the King completed a very entertaining (and filling for some) evening.

Farmer's Column

R. J. Milligan, District Agriculturist

All farmers in the Strathmore, Calgary area interested in seeing a demonstration of power spraying equipment should attend the demonstration at the Victoria Arena on June 9 starting at 2:00 p.m. Several companies are interested in demonstrating their machines for rates of application, ease with which machines can be adjusted, etc. and various phases of the machines will be explained. Farmers can buy the machines following the demonstration.

About now, many of you farmers will be interested in insect control. The season is moist and cool, and the development of the insects has been delayed. For example, a corn, moist May will retard the hatching of cut worms, of which we may be infested with two different kinds; the Pale Western Cut Worm, which affects the grain fields from now on, and the Red Back Cut

Worm, and often the Pale Western Cut Worm also, will infest our gardens. That is, if you have been in the habit of keeping your garden clean and well cultivated during August. If your garden has a fine powdery surface during August, the cut worm will lay eggs. A control measure is to have a crusty surface on all summer fallows during August and early September.

Oddly enough, we plant our fair and fall wheat during the latter part of August and break up the crust. If we get sufficient moisture during May, the number of worms maturing to the moth stage will not be large enough to cause a risk in planting grains.

The Pale Western cut worm cannot be poisoned. The Red Back cut worm which inhabits the northern area of our province and many irrigated districts, often comes to the surface and can be poisoned.

Showers and wet weather tend to bring these larvae to the surface where the robins and other birds devour them.

I spoke of how to control wire worms two to three issues ago so this subject can be dropped for the present time. How many of you house wives like to go to the garden and bring in cauliflower or cabbage that is infested with the Green Cabbage Moth? Not many, I am sure. When you see the white butterflies flying around the garden and alighting on your cabbages and cauliflowers, rest assured that these butterflies are laying eggs. These insects can be controlled very easily. Dusting the vegetables with DDT will keep them under control. This dust has a Rotone Base or Derris Root which is toxic to insects and is not harmful to humans. This DDT can be used for many things.

It can be used to control insects on currant bushes, red or black, destroy ants and crayfish, etc. I set out some onion sets and dusted the green portions with DDT to help control onion maggots. Onion maggots are very difficult to control. Some people use soot from the stove to act as repellent. Others use Corrosive Sublimate, which is known to the druggist as bichloride of mercury. The quantity used in this case is one ounce to ten gallons of water, watering two inches on each side of the row when the onions are one to two inches high. Corrosive sublimate must be used in crockery, wooden or glass containers as it attacks metal and the effectiveness is partly lost.

Between dustings of DDT on your onions, a bordeaux mixture is good as a repellent. Avoid using lead arsenate or calcium arsenate on your vegetables of leafy nature such as cabbage or cauliflower. They should be used only for insects like potato bugs which devour the leaves or parts thereof. Bordeaux mixture with nicotine sulfate in it helps to control insects that suck to feed.

Be sure to thin vegetables such as head lettuce to a minimum of 9", cabbage 18", carrots to 1½" apart, and likewise the parsnips. Crowded vegetables are often misshapen and the quality is lessened. If your lettuce is head lettuce, it must be thinned to no less than 9". The small heads can be cut out to get your 9".

On irrigated land or in moist conditions, slugs or snails multiply under the leafy plant and causes them to decompose or rot. Sprinkling of lime under the plants will help control these insects, or spraying or dusting, whichever is the easier to apply. The slugs even cut into our sweet turnips. Since the garden is one of the most important part of the farm, especially from the house wife's standpoint, these few points are passed along to help you grow your garden more successfully.

Running a business without advertising is just like thumbing a ride in the dark—you know what you're doing, but no one else does.

Try a "Classified"

My Kingdom for Four-bit Haircut

Writing under this heading in the Olds Gazette, Neil Leatherdale was suspect, is doing his own bit in the way of propaganda for men's "inherent" rights. He goes on to say:

Ivan Craig, formerly of this neck of the woods and for the past few years a star boarder in the town of Bowler, returned last week and re-opened (opened) a barber shop in the premises of the town of Bowler by himself and more recently occupied by Ralph's Sports Shop.

Ivan is well-known here and no doubt he will soon build up a good clientele for he is reputed to be an excellent man at the trade.

We did think that Ivan would come to town with a four bit hair cut, but when he clipped his first couple of customers the usual 65c our hopes for the return of a good four bit hair cut vanished like the hair on the bearded ladies' face when she got her first date with

CHEMICAL SUMMERFALLOW
Farmers are taking a considerable interest in the prospect of replacing standard summerfallowing methods with "chemical summerfallowing."

In Manitoba, 17 illustration stations have found the average annual cost of summerfallowing in that province to be \$5.73 per acre. An application of 2.4-D can be applied at a rate heavy enough to kill the more susceptible weeds for an estimated \$1.40 per acre; 90c for the cost of the chemical and 56c for the cost of operating the machine.

Some believe that where the more resistant annuals and perennials do not exist, that this type of summerfallowing may become an important operation.

the sword swallower.

Never mind fellows, there is still one place where a dime buys a dime's worth and it hasn't gone up in price despite all the inflation in everything else.

An eye for opportunity is the eye that turns to the ads regularly.

Too Much Speed Is Dangerous

The speed limit on Alberta highways has been set at 55 miles an hour. At this speed you travel over 80 feet in one second. It is easy to see that a moment's inattention to the road may mean disaster. For safe driving, think, not of how fast you can drive, but of how fast you can stop.

Join the A.M.A. Without Delay

Membership in the A.M.A. brings many benefits, including free insurance, highway information, license service, travel routing and other valuable advantages at only \$10 for 12 months. You should be a member. Your nearest A.M.A. branch will gladly furnish full information on request.

A driver with normal reflexes driving a car equipped with good brakes stops, under favorable conditions, in the following distances:

at 55 m.p.h. 170 feet
at 50 m.p.h. 155 feet
at 40 m.p.h. 115 feet
at 30 m.p.h. 75 feet
at 20 m.p.h. 43 feet

With slow reflexes, inefficient brakes, or slippery road conditions, the distances travelled are much greater. Watch your speed, watch the road, drive safely.

It Pays to Belong to the A.M.A.

Better Pastures

There are too many run-down pastures on the farms of Alberta. This means that far too great an acreage must be devoted to pasture and these large acreages are not much better than exercise grounds for most of the year. Greatest returns from livestock can be obtained only if they harvest most of their forage themselves, and they should use as little energy as possible while doing so.

J. E. Birdsall, Supervisor of Crop Improvement for the Alberta Department of Agriculture, says that most of our pastures should fit into a general farm plan, and they should not remain down for more than four or five years. The forage growing on the land will add fibre and fertility. When it is plowed, better grain crops can be produced. By following such a plan, every part of the farm will benefit in the course of a few years, and over a long period the productivity of the farm can be built up rather than being allowed to run down.

Neither grasses nor legumes alone provide the best pasture. They should be grown in mixtures — grasses and legumes together. Legumes increase the feed value and bulk of the mixture, and they help to maintain soil fertility. Grasses fill the soil with needed root fibre. The two together provide a pasture that is very nutritious and, if the kinds are chosen carefully, they will provide good pasture fairly continuously throughout the season.

Full information about pasture mixtures and management can be

Farming News

Produced by the Alberta
Department of Agriculture

SUMMER ATTENTION

Aside from some replanting, about the only summer care the garden should need will be thinning, weeding and cultivation. If the soil is very dry it is advisable to water. One good soaking is worth a dozen sprinkles. Sprinkling only settles the dust and has a tendency to bring root growth too close to the surface where the sun is liable to hurt it. A little chemical fertilizer applied carefully according to directions is also a good thing at this time. It will hurry along growth and with vegetables will increase tenderness.

When the hot weather sets in it is as well to cut lawn grass less frequently and not as short. This protects roots from the burning sun. During warm weather is the best time to apply 2-4 D weed killers. This attacks broad-leaved weeds but leaves grass undamaged.

Beans, lettuce, carrots and beets can be planted at intervals right up to early July with still good prospects of a crop. Where fall climate is mild and moist peas can be sown for an autumn crop in late July.

HAY MAKING WITH CRESTED WHEATGRASS

To make a good quality hay crested wheatgrass may be cut just after heading and before full flowering. If left longer than this the grass becomes wiry and tough and is not particularly relished by stock. This is probably the main reason that crested wheatgrass hasn't been more widely utilized

obtained from District Agriculturists or from the Field Crops Branch, Alberta Department of Agriculture, Edmonton.

Freight Rate Increase

While the Crows Nest Pass agreement prevents any increase in the freight rate of shipping grains to the lakehead or to Vancouver without an act of parliament, it does not prevent an increase in service charges on grain shipments (or "stop-offs", "out-of-line" hauls and "back" hauls. In such cases the recent 21 per cent increase in freight rates applies.

for hay production in the past. When a considerable acreage has to be cut it is often advisable to start moving a little before heading so that the whole field will be down before the grass passes its best stage.

Yield data obtained at a number of points throughout the southeastern part of the province have shown that a yield of approximately three quarters to one ton of cured hay per acre may be expected in most years. This, of course, will depend upon available moisture. Regarding yield, it should be noted that the hay crop in any one year is the total growth since the previous year's cut. As a result, a crested wheatgrass field should not be put down after August in any one year if a good hay crop is expected the following year.

Information regarding seedling and managing crested wheatgrass for hay or pasture may be obtained from your District Agriculturist or from the nearest Dominion Experimental Station.

On wheat shipments which are stopped in transit for cleaning or drying the former charge of 1c per hundredweight has been increased to 1½c. Or if the wheat is stopped en route to the lakehead or Vancouver for milling a similar increase applies.

The "out-of-line" haul service charge applies to wheat shipped to a centre for milling or any other purpose from a point to either the lakehead or Vancouver or a more direct route. A 2½c increase applies on all such "out-of-line" hauls.

Service charges on grain going directly to the lakehead or Vancouver have not been increased, for has there been any change in cost of shipments of feed grains going to feeding areas, providing there are no "out-of-line" hauls or "stop-offs".

Freight rates on hay have increased by 21 per cent.

For Women Only

Helpful Hints—A very hot nail will not split plaster when driven in.

To clean kalsomine walls, wash off with a kalsomine brush and clean water. Brush the water on with up and down strokes as though kalsomining, making the wall fairly wet. Clean the brush often in the water and change water frequently. When dry, it will look very clean.

Small holes in linoleum may be mended as follows: Melt furniture glue, then add as much ground cork as the glue will take. (Corks may be ground with the food chopper). Fill this mixture into the hole and let dry thoroughly. This may be scrubbed over without becoming sticky and lasts as long as the linoleum itself, as well as keeping the hole from getting larger.

A burnt saucpan need not be discarded if you treat it like this: Pour some water into it and add an onion. Set it on to boil and you will soon find that all the burnt matter will loosen and rise to the top, leaving the saucpan clear and bright again.

When boiling a cauliflower whole, put it in the saucpan upside down so that any scum on the water will not affect the white part.

When the hot weather sets in, it

is as well to cut the lawn grass less frequently and not as short. This protects roots from the burning sun.

NEW GARDEN BULLETINS

Two new bulletins of interest to Alberta gardeners are now available from the Department of Extension, University of Alberta. The first, prepared by Dr. R. J. Hilton of the Department of Science, deals with home vegetable growing. The author points out the advantages of the home garden and describes in detail the steps to be taken to obtain full value for efforts expended.

The second publication prepared by Dr. A. W. Henry, discusses vegetable seed treatment. It outlines methods of disinfecting or vegetable seed, provides a list of chemical drugs for treatment, and offers information on seed-borne diseases and vegetable seed protection. The names of these publications are "Home Vegetable Growing" and "Treatment of Vegetable Seeds." Both can be obtained on application to the Department of Extension, University of Alberta.

BEAUTY AIDS—

Very few girls have eyebrows that are not all the prettier for a little grooming. Brushing alone may accomplish the desired effect. But if the little hairs are out of line, tweezing them from the lower edge of the brows will make the eyes look larger and brighter and give the brows themselves a cared-for look.

A too broad nose, delicately tinted with a light bluish of coloring that blends into cheek rouge will appear finer and in better proportion. A nose that is narrow except at the tip can be given better lines if the slight shading is done at the sides of the tip. If the nose is generally out of proportion, a shade of powder a little darker than that used on the remaining facial skin will give it the illusion of better proportion. A nose that is long and thin should be ever so lightly shaded with a dark powder.

When using a dark powder, either to minimize a too large nose or to make a protruding chin less noticeable, it is important that the outer edges of the application blend well into your lighter shade of powder. To best accomplish this, use the lighter powder first, then use the darker powder only over the features or areas that appear too prominent.

If an indefinite hairline frames the face it might be well to use either a black or brown eyebrow pencil for giving it a more definite line. A widow's peak can be greatly accentuated with the correct shade of pencil.

To best accomplish any reshaping of the lips use two shades of rouge. A light shade to be spread over the entire lips, and the darker shade to be used over the margin. Then after the two tones are applied, they should be blended with the finger tips.

RECIPE

Meat Soufflé—

3 tablespoons fat
4 tablespoons flour
1 cup milk
3 tablespoons fine dry bread crumbs
1 egg, separated
½ cup cooked meat, ground salt and pepper to taste
Melt fat in top of double boiler, add flour and blend. Add milk slowly and stir constantly until very thick. Add crumbs, beaten egg yolk, and meat to sauce. Mix well and season to taste. Fold in stiffly beaten egg white. Turn into 2 well-greased custard cups. Steam 25 to 40 minutes or until a silver knife inserted in the centre, comes out clean. Yield: two servings.

A G.I. stationed in China noticed several deserted villages near the railroad tracks over which an American train had been running. He questioned an interpreter about this. The reply was that many of the natives feared the "Foreign Dragon," meaning, of course, the American train.

"Well," said the G.I., "they ought not to be afraid of a dragon. Haven't you had dragons here for centuries?"
"Oh, yes," was the reply, "but our dragons only breathe fire thru their nostrils. Foreign dragons blow smoke out of head, blow steam out of sides, show fire in bellies at night, scream worse than hundred typhoons, go fast as thousand devils, and have red ends on long tails in which people can see those whom dragons have swallowed."

Don't bother to pack away outgrown things. Sell'em with a

Cluny Notes

by Mrs. G.W.B.

Mrs. A. F. Reilley and two sons, who have been living in Banff, are at present visiting Cluny relatives and friends. Mr. and Mrs. Reilley are moving to Nordegg.

Mrs. I. Goldsmith had her sister-in-law, Mrs. Marshall of Calgary, and her niece, Mrs. Bliss of Sundry, to spend the long weekend with her.

Mrs. Aman is holidaying with her daughter, Mrs. Arthur Prowse.

Mrs. Mustard is at present staying with her daughter, Mrs. Ronald Clark.

The graduation dance sponsored by the high school students was very successful, the young ladies looking very charming in formal.

Both hall and dining room were tastefully decorated in the school colors.

A number of former students took this opportunity of renewing acquaintances.

A delicious lunch was served by the students. Harold Anderson's orchestra supplied the music in their usual style.

The last W. A. meeting for the season was held at the home of Mrs. W. James Monday, May 31st. Ten members and one visitor present. Plans for the bazaar were discussed but on account of the late season and everyone being very busy, everything was tabled until September.

The "Cooking Cravers" club have held three very successful meetings in the last month. Miss Hogg visited and gave us a very interesting talk and some welcome suggestions and pointers.

The girls are planning an "Achievement Day" on June 8th, when a programme will be held and all work will be displayed. Tea is to be served to raise funds to send a girl to Olds.

The girls have enjoyed this year's work very much under their leader, Mrs. Derrick.

MORE BREAD FOR THE WORLD

because Massey-Harris Combines enable one man in one day, to harvest wheat for 55,000 loaves

Yes, more food is available for the world today when its need is desperate, because Canadian farmers with only a two-thirds increase in numbers over 1900, are growing 4½ times as much grain, producing 2½ times as much milk, feeding twice as many cattle and 2½ times as many hogs, raising 5 times as many chickens; because they are providing food for 2½ times as many people in Canada and exporting 30 times as much wheat and 10 times as much flour.

Farmers are doing it because individually they produce more today than in 1900, but it means hard work. And there is no harder working group of people in the world than the Canadian farmers. But hard work alone would not be enough to accomplish such results. They do it by a combination of hard work and modern machinery.

Typical of the great, efficiency-increasing machinery of the farm today is the Self-Propelled Combine, pictured above, which Massey-Harris first introduced in 1939. With this machine, one man can cut and thresh enough wheat in one day to make 55,000 loaves of bread.

Modern farm machinery has increased the productive capacity of Canadian agriculture to where it provides an abundant surplus for the needs of those in other lands, and makes an important contribution to Canada's great export trade.

Similarly Massey-Harris machines are helping to increase farm production in 72 countries of 6 continents.

UNDER THE STREETLAMP

Grandpappy Morgan, a hillbilly of the Ozarks had wandered off into the hills and when supper time came and he failed to return, young Jake was sent out to search for him and bring him in. Jake located Grandpappy standing quietly in a clump of bushes.

"Gittin' dark Grandpappy," said Jake.

"Supper's ready."

"Yep."

"Ain't ye hungry, Grandpap?"

"Yep."

"Wal, ain't ye comin' home?"

"Nope."

"Why not?"

"Cain't."

"Why cain't ye?"

"Standin' in a b'ar trap."

Syd Coldwell says that a lot of people who had money to burn last year are busy right now sifting the ashes.

Bill Tew tells of the chap at the hop the other night who kept trying to open his car door, but couldn't fit the key into the lock. Kept missing the keyhole by a mile. Bill watched his confusion and then asked: "Are you gonna drive in your condition?" "Shure," hiccupped the stew, "I'm too drunk to walk!"

Men are peculiar animals, just as women have long suspected. For instance, a fellow who hadn't kissed his wife in five years shot a man who did.

Verna May Cannon: "The horse I was riding wanted to go one way and I wanted to go another."

Enid Baldwin: "Who won?"

Verna May: "He tossed me for it."

Dr. L. B. Pett of the national health department told the parliamentary prices committee that a loaf of bread selling in Eastern Canada at 10c was nutritionally better than a loaf that was selling for 14c. Dr. Pett stated that the cheaper loaf had 48 more calories than the more expensive loaf.

During the first part of 1948 bread grains supplied 37 per cent of the 2,681 calories — the average daily per capita food intake of the British people. Prior to the war the British people obtained an average of 3,000 calories a day, of which bread grains supplied 28 per cent.

Ronnie Wilkinson: "Give me two four-watt bulbs."
Maynard Conybeare: "Two what?"

Ronnie: "No. Four watt."
Maynard: "For what?"
Ronnie: "That's right."

FARM TIRE Service

THAT SAVES YOU MONEY

OUR STANDARDS are high. We have the facilities and experience necessary to do the best possible job on your tires. Our service means the detection and correction of little troubles before they become big ones. We'll solve your tire problems and save you money. And when you need new tires let us quote you on Firestone — Canada's Number One Farm Tire, the tire we are proud to recommend.

Farm News

Produced by the Alberta Department of Agriculture

During the past 15 years agricultural science has gone ahead in leaps and bounds in helping farmers to increase the yield and quality of their grain crops. First we had the outstanding conquest of wheat stem rust, which had caused enormous losses to wheat growers the world over for thousands of years. Next new methods of plant breeding which have produced earlier varieties and so have saved hundreds of millions of bushels of wheat from damage from early frosts. Then came mercurial dust, a method of controlling smut and some bacterial disease which, too, had caused losses to farmers in

the past. Now in process of experimentation, and holding great promise, is at least the partial control over weeds by the magic chemical 2,4-D, and weeds have robbed farmers since the first day that agriculture was ever practiced on this earth. And finally we have the promise of increased rainfall by bombarding moisture-laden clouds with dry ice.

The average longtime yield of wheat, up to 15 years ago, on our Canadian prairies was 16 bushels to the acre. All these remarkable scientific inventions together may add, it is calculated, an additional 25% to the yield per acre, and at

NARAMATA SCHOOL STUDENTS GIVE INTERESTING RESUME

Miss M. Vallentine and Miss A. Durner gave an enthusiastic and interesting account of their line, their work, the benefit and the excellent influence of the Christian Youth School at Naramata, B.C., speaking in the United Church on Thursday evening.

This Fall the School will be opened October 1st and continued for six months.

Local News Items

Mrs. Hermanson arrived home from the hospital this week, considerably stronger and more like her old self again.

Playing against Carleton on Sunday, Strathmore's baseball club took the game with a score of 15 to 13.

Mr. Bill Hermanson entered the General hospital on Wednesday for an appendix operation.

Mr. A. Devaux, who suffered a broken finger while working on the farm some time back, has had to have the finger broken again and reset. This time he was assured the setting was perfect.

Local telephone wires are receiving a complete check-over by E. V. McPartland, local agent, and George Hilton, who is assisting him. Many of the worn wires are being replaced.

M. Conybeare and Ed Hamilton purchased a new truck for Central electric last week, and gave it a trial over the weekend by visiting their homes in High River.

Jack Oldham has been visiting in Strathmore the last few days, and marketing a new-type fire detector, which is claimed to be the most modern thing in fire detection. While here he was visiting a number of old-time acquaintances.

Mrs. Alice Polley and Beverly visited Edmonton over the week-end, where Mrs. Polley attended the wedding of a friend.

Following the Edmonton meeting of the Alberta Conference of the United Church, the Rev. A. A. Hamilton returned to Strathmore on Monday evening.

Members of the Young People's group gathered around a campfire on Saturday evening for a wienner and marshmallow roast. Songs and dancing were also enjoyed in the open.

Mr. Archie Klüber came through his operation quite successfully last week, but is expected to have to remain in hospital for some time yet, taking further treatment.

Mrs. J. G. Porteous entertained a bridge luncheon on Tuesday in honor of Miss Wanda Knapp, a bride elect. Mrs. T. S. Hughes won first prize, and Miss Gladys Hughes won the consolation. Miss Knapp was presented with a Birk's gift certificate from those present.

Mrs. Anne Bremner has accepted a position with the U.F.A. as book-keeper.

Plans are going ahead for the meeting next Tuesday of the Women's Institutes in Strathmore. An excellent turnout is anticipated.

Work at the tennis courts has reached the stage where one court is in play, and the other is fast being made ready. Considerable equipment was needed by the group, including tapes, nets and more shade.

Mr. and Mrs. Baldwin and Ent plan to leave this week-end for Ottawa and points east, for a holiday, ending up by driving home with a new car.

Mr. and Mrs. T. S. Hughes entertained on Tuesday evening for Miss Wanda Knapp, a bride elect of June. Among those present were Mr. and Mrs. Paul Cardell, Mr. Bob Walford and Dr. Don Johnson.

Ronnie Crowther took his dog in to Calgary on Monday evening, for treatment. The dog seems to have been suffering from worms, which caused him to take fits.

Gordon Keeling was taken to hospital on Monday, as a result of a severe cramp suffered on Sunday, but was released early in the week with no further ill effect.

Art Dunsmore and Alf Tannas were visiting from Rockyford over Wednesday and Thursday, in connection with the Lions Auction Sale there in the near future. They hope for even greater success than last year.

Len Gilbert, who was formerly stationed here with CFCS, was a visitor in town over Tuesday.

Bob Risdon has been working at the shop over the past couple of weeks, doing some repairing and building to a new drilling rig he is putting in operation.

Ardenode News

by H. S.

Miss Joan Brook of Calgary, is spending several weeks holiday at her home here.

Mrs. P. D. Sarsons and baby daughter came home last Thursday, both looking very well.

Mrs. Aweock of Calgary is spending several days at the home of Mr. and Mrs. P. D. Sarsons.

Mr. and Mrs. C. O. Dawson, also Mrs. Cliff Dawson and Mrs. Wegeter spent Saturday last visiting in Calgary.

Mr. and Mrs. H. Dawson and daughter, Heather, were visitors at the home of Mr. and Mrs. George Dawson one day last week.

The road grader is on the job again, is spending part of her holidays at her home here.

Mr. and Mrs. G. H. Godfrey entertained a few friends at an ice cream social Sunday last.

Seeding is just about completed in this district. The farmers are working day and night to catch up. There are a lot of low lying patches that won't be seeded this year, owing to the lateness and the ground being so wet.

The road grader is on the job again trying to smooth out some of the ruts. Mr. H. Hendrickson is our new man. We are hoping for good roads from now on.

Mrs. A. W. Ansell and daughter.

Home and School

be religious, able to think and carry responsibility in many ways. Education should teach one to distinguish between idle words and reality, be tolerant, not biased, and to develop a philosophy and culture.

The Vocational Method of today, he felt, tended to lessen this standard and a keen rivalry between the two exists. He therefore urged a Middle Course.

Mr. MacLeod in opening, stated the dilemma today of the High School as distinct from that of the Public School or the University; whereas each of these had a definite schedule. The High School was, in a way, sandwiched in between the two with at present a combination of Academic and Vocational methods. The speaker said that twenty years ago the High School was Academic, but the modern trend had broken in on this and the problem is not yet solved. He dealt in detail with the question of Composite High Schools for the smaller areas and pictured the difficulties making the establishment impractical.

Mr. Jerome Hansen followed with a detailed accounting of modern methods as opposed to the languages and classics of the Academic. He felt that education should embrace an understanding of politics.

Eileen, of Saskatoon, are spending a few weeks at her parental home here, Mr. and Mrs. J. A. Lytle, also Mr. and Mrs. O. Stewart.

Mr. and Mrs. Ted Hartell of Calgary were guests at the home of Mr. and Mrs. D. S. Brook Tuesday.

It is sensible to sell or buy used articles. The cost of classified advertising is small, but the results are big.

for authority, and pointed to many drawbacks of the present system.

Mr. Parry took up the case for the Vocational side. He told of the limited number who go to University, and suggested an opportunity to give to every child according to his needs had been the prime origin of the Vocational High School, wherein boys and girls who never would master a purely Academic Course would be given an opportunity to develop along other necessary lines and so become useful and creditable citizens. It also provided a place where children could be kept interested and develop in beneficial activity before old enough to take on definite lines of work.

Mr. Parry stated that an A student in Academic lines would also probably be an A student in the vocational.

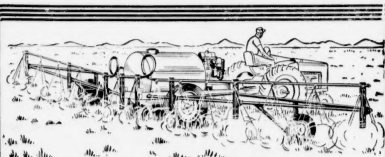

He told the development of the composite high school in Calgary and the place and influence was maintaining among the business men of Calgary, who frequently came to them for a capable employee. The discussion was amicably carried back and forth, and a compromise summing up was made by chairman Rev. Hamilton. The chairman felt that all speakers had maintained a keen interest in the highest development of the Educational system. That character is the prime need of our world and should be the main purpose of education.

A warm vote of appreciation was extended to the speakers, and to Miss Skele and her pupils for their entertainment.

Folk Dancers in the group were, Shirley Vroslon, Johnny Abell, Norma Jear, Anderson, Archie Henderson, Mary Lauverysen, Rowland McKenzie, Irene Bennett, and Bruce Potter.

The Chorus comprised pupils from Grade IV to VII.

The costumes for the dance were designed by Miss Blair and Grade VII Art students assisted with the work.
